Guidelines for Contributors

Editorial Policy

Fire Management Notes (*FMN*) is an international quarterly magazine for the wildland fire community. *FMN* welcomes unsolicited manuscripts from readers on any subject related to fire management. (See the subject index of the first issue of each volume for a list of topics covered in the past.)

Because space is a consideration, long manuscripts are subject to publication delay and editorial cutting; *FMN* **does** print short pieces of interest to readers.

Submission Guidelines

Authors are asked to type or word-process their articles on white paper (double-spaced) on one side. Try to keep titles concise and descriptive; subheadings and bulleted material are useful and help readability. As a general rule of clear writing, use the active voice (e.g., Fire managers know . . . **not** It is known . . .).

Submit articles to either the general manager or the editor. Complete details to reach them follow:

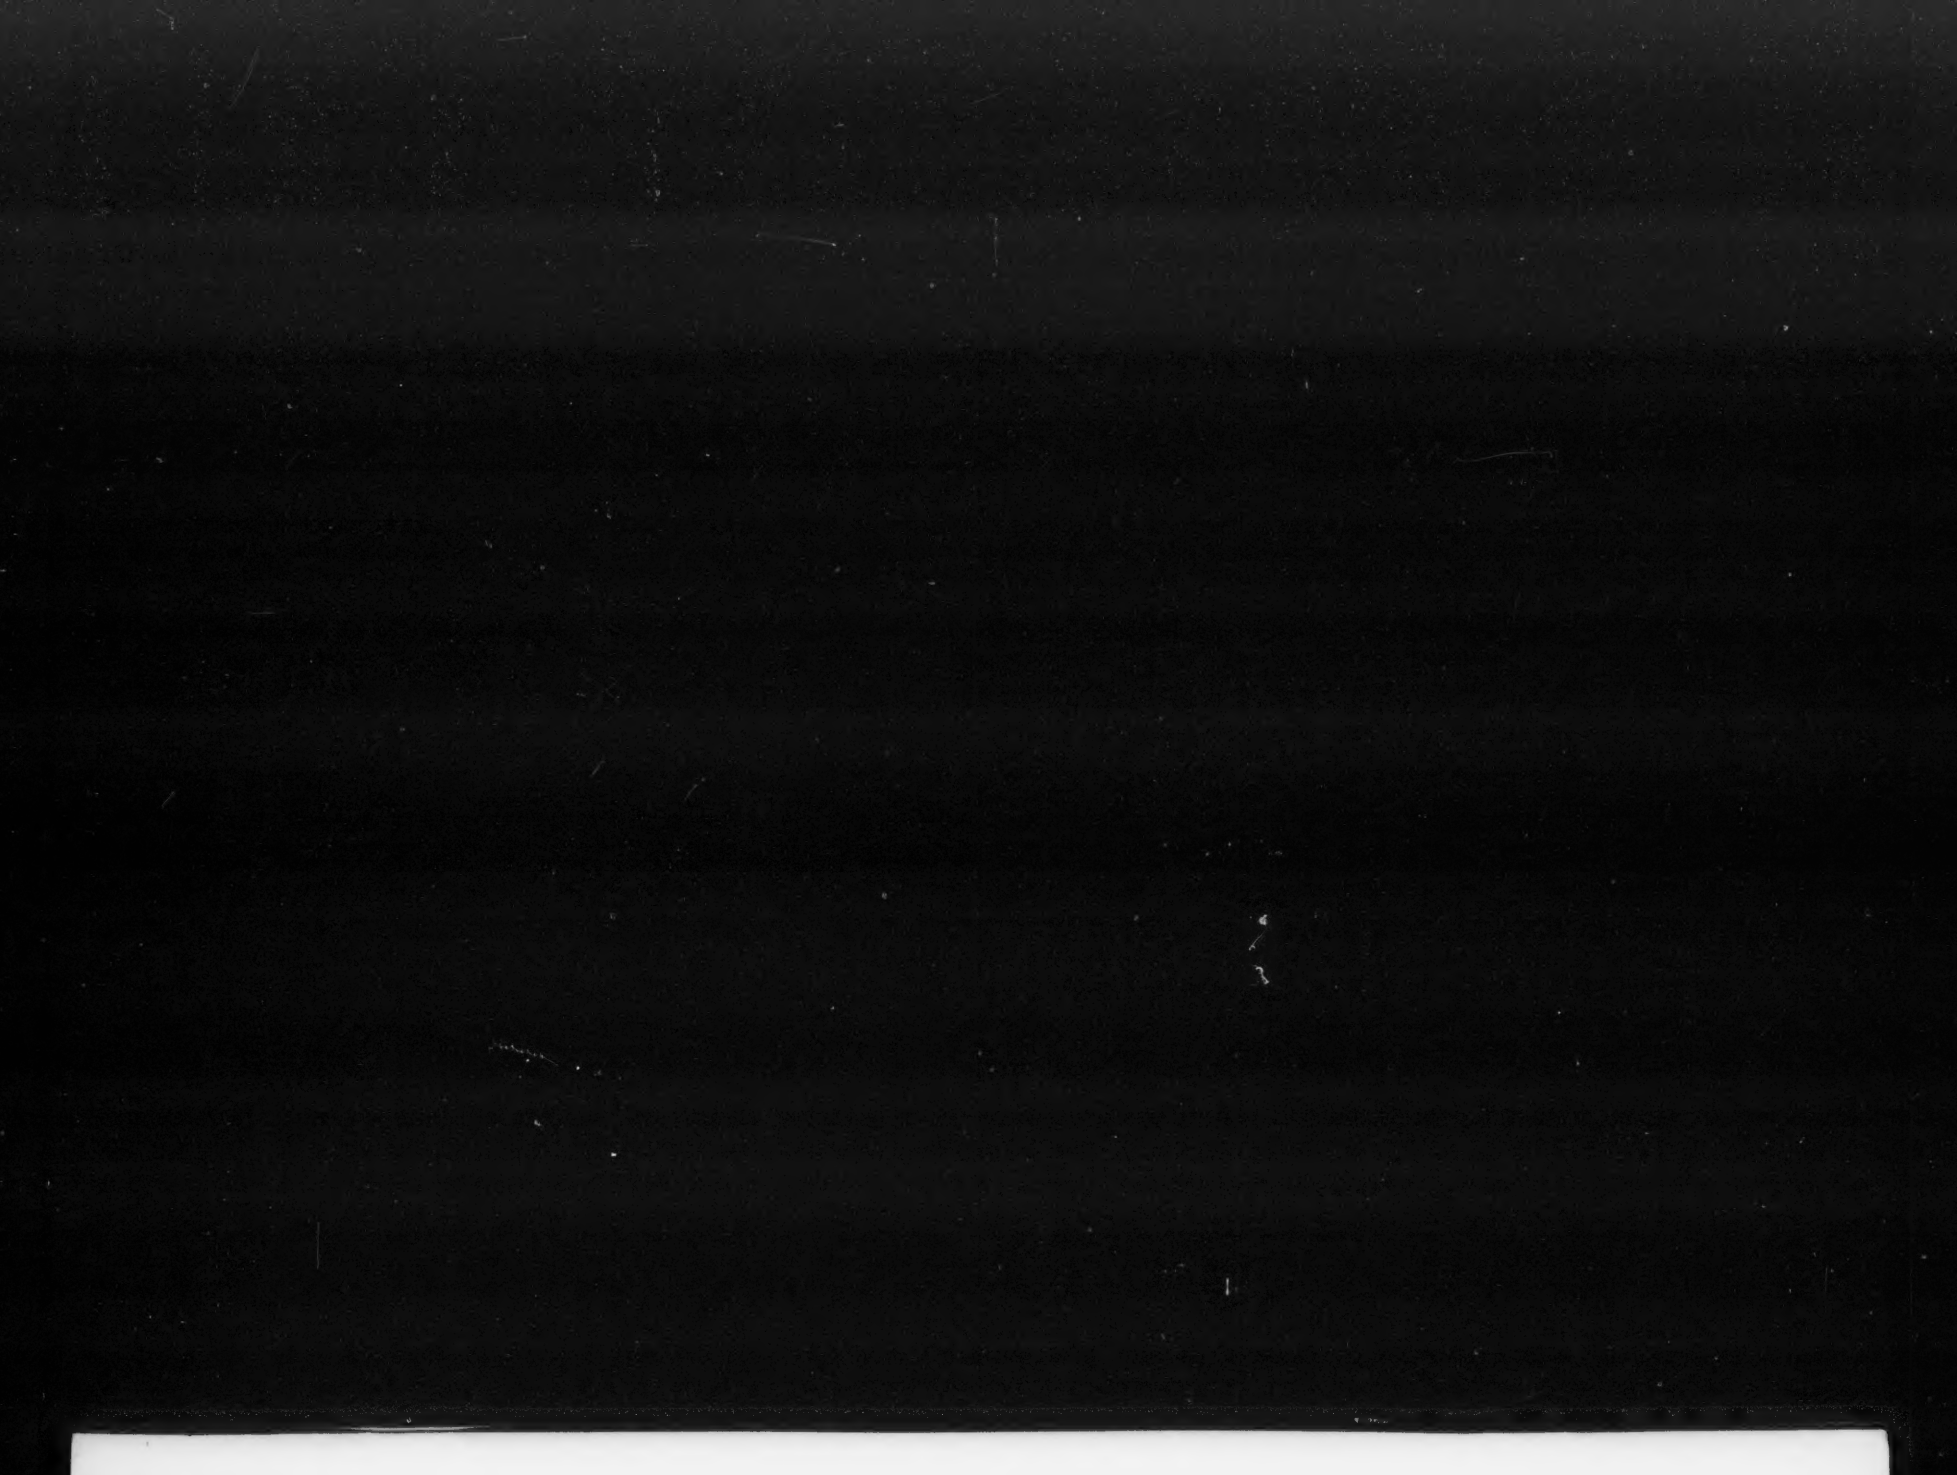
Include with the paper copy the complete name(s) and address(es) of authors as well as telephone and fax numbers and e-mail information. If the same or a similar article is being submitted elsewhere, include that information also.

Disks should be submitted with the paper copy. *FMN* prefers any version of WordPerfect, Microsoft Word, or an ASCII text file on IBM/Dos-compatible disks. Please label the disk carefully with system being used and name of file. When possible, submit illustrations on disk as well and include instructions for use on the label.

Consult recent issues for placement of the author's name, title, agency affiliation, and location as well as style for paragraph headings and references. *FMN* uses the spelling, capitalization, hyphenation, and other styles as recommended by the U.S. Government Printing Office "Style Manual." Inhouse editing can be expedited if authors have their article reviewed by peers and by someone with editing skills. Please list the editor and/or reviewer/s when submitting.

Authors are asked to use the English unit system of weight and measure, with equivalent values in the metric system. Tables should be typed, with titles and column headings capitalized, as shown in recent issues; tables should be understandable without reading the text. Include tables at the end of the manuscript.

Figures and illustrations (black ink drawings when applicable), and slides and clear photographs (preferably glossy black and white prints) are often essential to the understanding of articles. On the back, please label carefully (figure 1, figure 2; photograph A, B, C, etc.); include your complete name and address if you wish your material returned, and indicate the "top." Clear, thorough captions (see recent issues) should be labeled to correspond with these designations.


All photos and illustrations require a written release, whether taken or drawn by government or nongovernment photographers and designers. Authors not in the Federal government sign a release acknowledging that they are aware that their work will be in the public domain. Please request forms from the editor. ■
